

4th Grade

Week #2

Jacob's Problem

It was the first day of fifth grade and Jacob was a nervous wreck. He wasn't concerned about his classes or all the homework. Jacob was worried about learning his locker combination.

In 4th grade, everyone had a locker, but you didn't have to learn a combination. Fifth grade was different. Jacob was scared that he would be the only one who didn't know how to open his locker.

On Back to School Night, everyone came to the school to meet their teacher and find their classrooms. There was also time to practice opening your locker, so Jacob was determined to learn this skill before the first day of school.

When they arrived at Back to School Night, Jacob's mom headed to fill out all the paperwork, while Jacob went straight to his locker, armed with his combination. All around him, kids were opening their lockers on the first try and happily shouting to their friends about how easy it was. Jacob attempted to open his locker 4 times with no luck. He left Back to School night feeling defeated and even more worried about the first day of fifth grade.

The first day arrived and Jacob felt sick to his stomach. When he got off the bus and headed to his locker, he slowly pulled the combination out of this backpack and began turning the dial. He concentrated really hard and took his time. When he turned to the last number, he held his breath and lifted up the handle. He was shocked when the locker actually opened. He did it! He finally opened his locker with the combination.

"Maybe fifth grade won't be so hard after all," Jacob thought to himself.

PROVE IT!

Answer each question with text based evidence. Each response must have an evidence prompt included. Refer to your evidence bookmark for help.

1. What does it mean when it says "Jacob was a nervous wreck"? ?

2. How was 4th grade different from 5th grade?

3. In your own words, describe what Back to School Night is.

4. Name the conflict in this text. How did the main character overcome it?

5. How does Jacob's attitude change throughout the story?

Questioning Reading Log

Title of book: _____

Chapter/Pages: _____

Today I am focusing on: questioning

Is this book fiction or non-fiction? _____

Write an "I wonder... because..." sentence. _____

Write a sentence using a question word (Who?, What?, When?, Where?, Why?, How?).

Now try to answer one of your questions.

Sample Bio Poem

Amy

Funny, compassionate, curious, organized
Daughter of Paul and Kendra, sister of Owen
Lover of her brother, animals and pacifiers
Who feels happy, curious and frequently frustrated
Who needs hugs, soy milk and somebody fun to play
with
Who gives smiles, love and shoes
Who fears loud noises, not seeing her mom, and the
dark
Who would like to see the inside of the fridge, how
things work and more time spent playing
Who dislikes getting her head wet, eggs and being told
no
Who resides in Evansville

Smith

Adding Tenths and Hundredths

Lesson 5-5

DATE

TIME

Use what you know about equivalent fractions to add. Write an equation to show your work.

- 1 5 tenths + 27 hundredths

Equation (in words): _____

- 2 16 hundredths + 7 tenths

Equation (in words): _____

- 3 $\frac{8}{100} + \frac{6}{10}$

Equation: _____

- 4 $\frac{42}{100} + \frac{9}{10}$

Equation: _____

- 5 $\frac{3}{10} + \frac{50}{100}$

Equation: _____

- 6 $\frac{1}{10} + \frac{5}{100} + \frac{20}{10} + \frac{55}{100}$

Equation: _____

- 7 $1\frac{2}{10} + 6\frac{35}{100}$

Equation: _____

Try This

- 8 Ali shaded 0.4 of a hundreds grid. Tarun shaded 0.32 of the same grid. How much of the grid did they shade in all?

Number model with unknown: _____

Answer: _____ of the grid

Explain how you got your answer.

Be A Factor

Materials

One deck of playing cards (remove Tens and face cards; Aces = 1, Jokers = 0). One game board for each player. One score sheet for each player.

Rules and Play

1. *Be a Factor* is a game for two to four players.
2. The object of the game is to collect the most cards. Cards are collected by playing a card that is a factor of 24 in the discard pile.
3. The dealer shuffles the cards and distributes three cards to each of the players.
4. The game begins by having one of the players draw a card. (S)he must then decide which card to discard from his/her hand. When a card is placed on the discard pile, the player must declare whether or not it is a factor of 24. If the card is a factor of 24, that player wins all the cards in the discard pile and another turn. If a player answers incorrectly and is challenged by an opponent, (s)he must pay back one card to the pack. If the discard is not a factor of 24, play passes to the next player. Players take turns in clockwise order.
5. It is important to note that players must explain why the card they play is a factor of 24 before they are allowed to remove cards from the discard pile. For example, if a player played an 8 on the discard pile, (s)he would need to say, "8 is a factor of 24 because $8 \times 3 = 24$ ".

6. Play rotates clockwise until the pack is depleted or time is called.
7. The winner of the game is the player with the most cards.

Variations

- Allow players to remove sets of cards from the discard pile if the play is a factor of some number other than 24. For example, use 12, 18, etc.
- For advanced play, allow factors of combinations of numbers, such as 9 or 15, 24 or 9, etc.
