

Math

(10-15 min. per day)

Contents:

- 12 activities ~~and~~ for math
- number “cards” if you don’t have a deck of cards
- a number die, and a dot die, to cut out for if you don’t have dice at home

Instructions:

Week 1: Addition-- 📷 Take pictures of play and share with your teacher!

- **Addition Top-It:** use a deck of number cards; each player draws 2 cards and adds the numbers together. Highest sum keeps the pair. Start with #s to 5, increase to 10 with practice.
- **Roll and Record** (adding two rolls): roll 2 dice/1 die twice, add the numbers together and write the number.
- **Dice Addition:** roll the dice, record each number and add together.
- **Lego Addition:** need 1 die, lego bricks, game pieces (dry pasta, coins, etc), game board; Directions on separate page.
- **Number Stories** (addition): use given number stories to practice solving word problems. Make up a few of your own.
- **Addition Color Page:** complete as directed.

Week 2—on the back... 😊

Week 2: Subtraction-- 📷 Take pictures of play and share with your teacher!

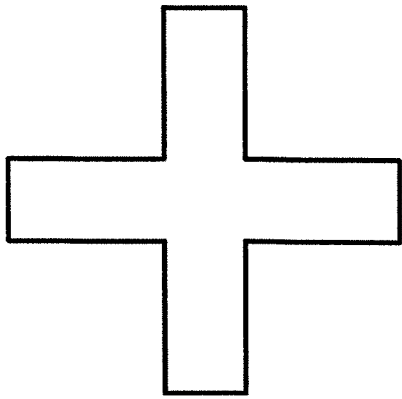

- **Subtraction Top-It:** use a deck of number cards; each player draws 2 cards. Subtract (take away) the smaller number from the larger number. Lowest difference keeps the pair. Start with #s to 5, increase to 10 with practice.
- **Roll A Difference:** roll the die, record numbers, subtract (take away) the smaller number. Record your answers.
- **Lego Subtraction:** need 1 die, lego bricks, game pieces (dry pasta, coins, etc), game board; Directions on separate page.
- **Number Stories** (subtraction): use given number stories to practice solving word problems. Make up a few of your own.
- **Subtraction Color page:** complete as directed

Friday, May 15—

REVIEW: Lego Addition & Subtraction: need 1 die, lego bricks, game pieces (dry pasta, coins, etc), game board; Directions on separate page.

- **NOTE:** You do not have to do them in order each week. You can pick and choose when to do each activity, as long as you are practicing MATH. 😊

LEGO games

Addition to 5 Week of 5/4/20

Give each group a game board, a die, LEGOS and enough game pieces (dry pasta, coins, etc.) for each player to have one.

Each player starts with zero bricks. Player One rolls the die, moves her game piece and adds the number of bricks written on the space to her stack.

Then the next player takes a turn. The player with the most bricks when all players have reached the end wins.

Subtraction within 5 Week of 5/11/20

Give each group a game board, a die, LEGOS and enough game pieces (dry pasta, coins, etc.) for each player to have one.

Each player starts with a tower of 25 bricks. Player One rolls the die, moves her game piece and takes off the number of bricks written on the space from her stack.

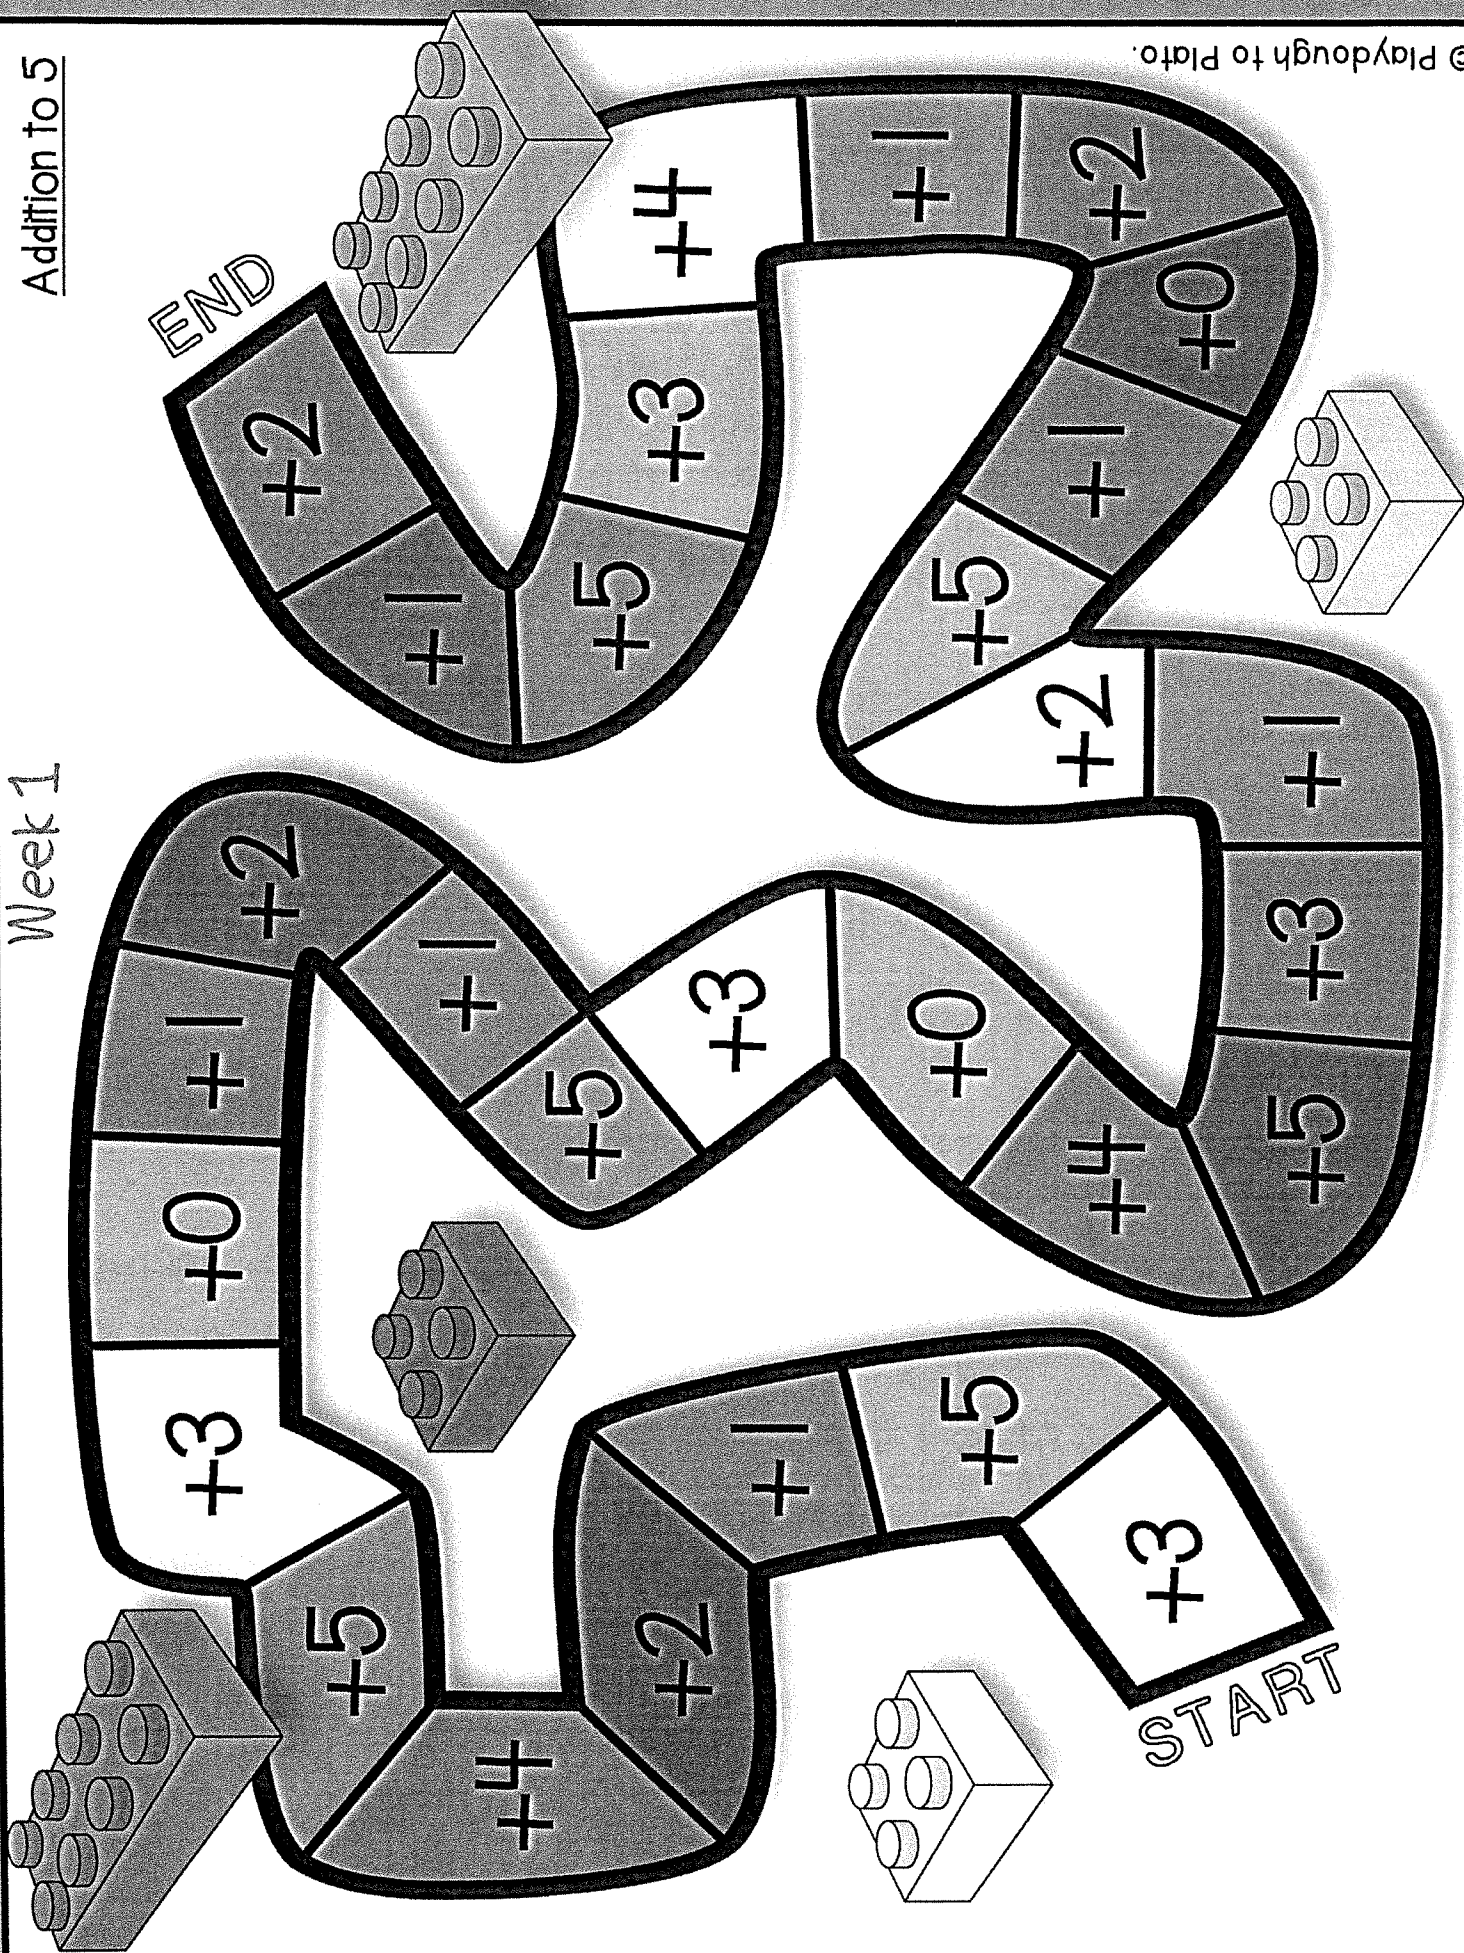

Then the next player takes a turn. The player with the fewest bricks when all players have reached the end wins.

Addition and Subtraction Week of 5/11/20

Give each group a game board, a die, LEGOS and enough game pieces (dry pasta, coins, etc.) for each player to have one.

Each player starts with a tower of 10 bricks. Player One rolls the die, moves her game piece and adds or subtracts the number of bricks written on the space from her stack.

Then the next player takes a turn. The player with the most bricks when all players have reached the end wins.

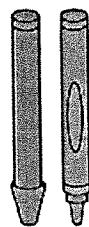

START

Dice Addition

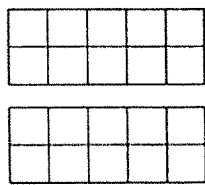

What You Need

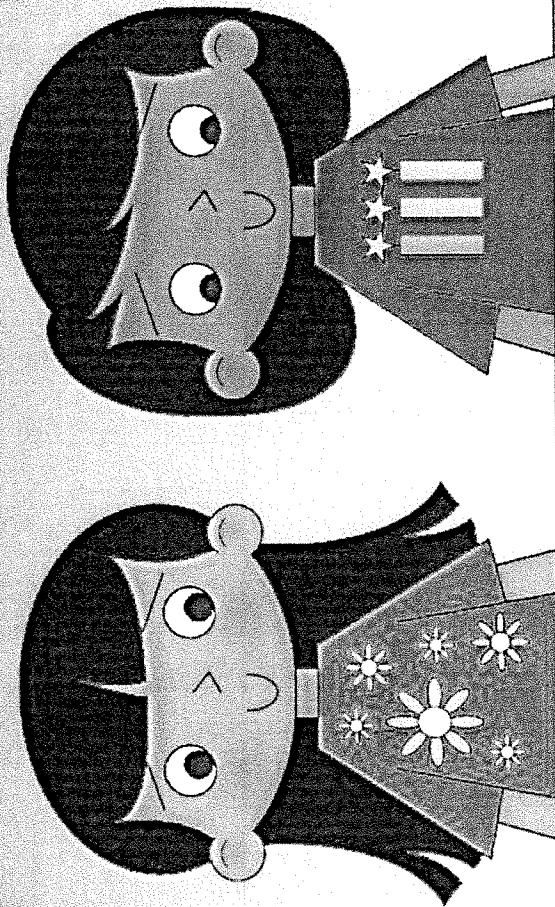

Dice Addition dice

markers or crayons

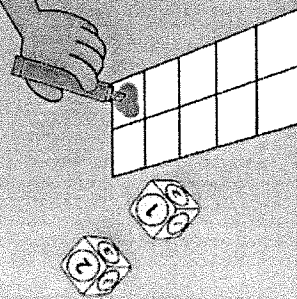

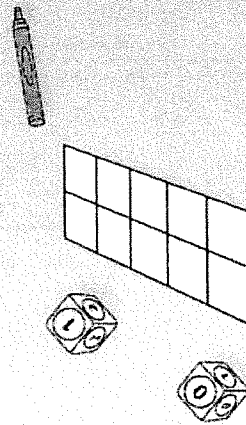

ten frames

What To Do

Play with a partner or small group.

- 1 Roll both dice.
- 2 Add the numbers to find the **total**.
- 3 Compare the totals.
- 4 Mark your **ten frame** if you have the **greatest (highest)** total.
- 5 Play until someone fills their ten frame.

Addition Top-It

What You Need

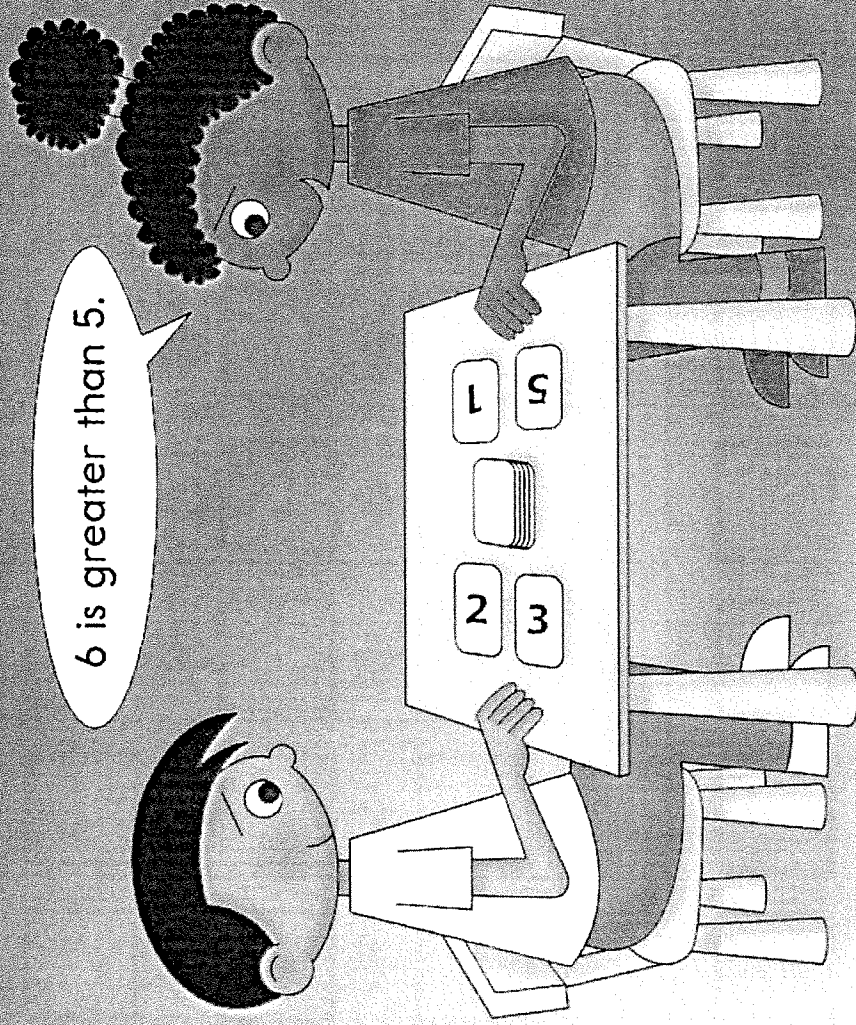

Addition Top-It deck

What To Do

Play Addition Top-It with a partner.

- 1 Take two cards and **add** them together.
- 2 **Compare** your **total** to your partner's.
- 3 The player with the **greater total** takes the cards.
If it's a tie, take two more cards and repeat.
- 4 Play until all the cards are used.

Directions: Solve the addition number stories

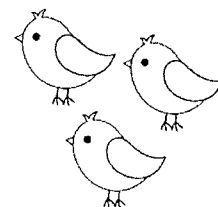

1. Bob has 3 orange fish in his fishbowl. He went to the pet store and bought 2 yellow fish. How many fish does he have all together?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

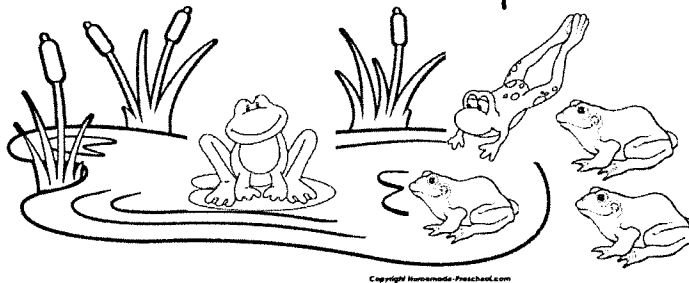

2. Liz saw 5 blue birds and 3 red birds eating in her yard. How many birds are there eating all together?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

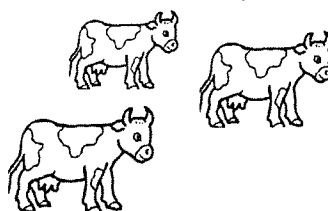

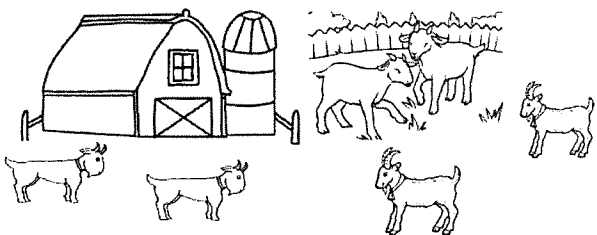

3. There is 1 frog in the pond. Then, 4 more frogs join him. How many frogs are there at the pond now?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

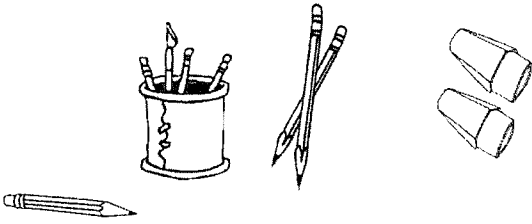

4. On the farm there are 6 goats playing near the barn and 3 cows in the field. How many animals are there in all?

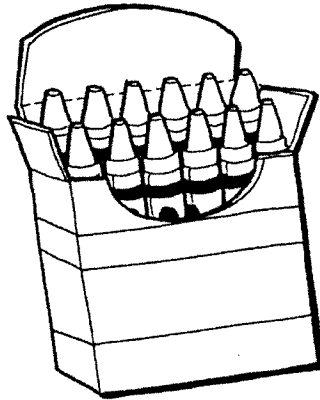

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

5. There are 7 pencils and 2 erasers on the table. How many school supplies are there on the table?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

6. There are 6 crayons in the back of the box and 6 crayons in the front of the box. How many crayons are there in all?

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$
